

MOOG
NASCAR

OFFICIAL STEERING & SUSPENSION OF NASCAR®

DID YOU KNOW?
ADVICE FOR THE PROFESSIONAL

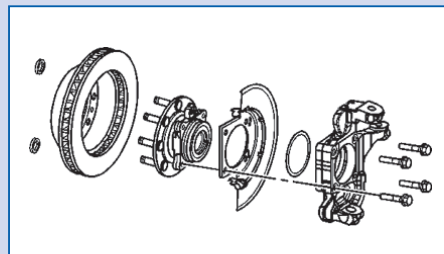

Overview

This bulletin will assist technicians replacing a front hub assembly on 2007 Chevrolet and GMC trucks. Before performing this service, it is crucial that you correctly identify the body style platform of the vehicle.

GM made a mid-year model change in 2007. They carried over the GMT 800 platform (labeled the "Classic" style), but later in the year introduced the new GMT 900 platform (labeled the "New" style). However, no definitive date break is available.

Vehicles affected

CHEVY/ GMC	1500 4x4	2007 'New' 900 platform
	2500 4x4	
	3500 4x2	
	3500 4x4	
CHEVY/ GMC	1500 4x4	2007 'Classic' 800 platform
	2500 4x4	
	3500 4x2	
	3500 4x4	

Inspection Procedure

It is up to the technician to look carefully at the vehicle and the part being replaced. This will enable the technician to identify the platform and select the correct MOOG® replacement hub assembly.

Inspection Procedure (Con't)

Front End Design Differences

The **GMT 800 ('Classic')** has headlamp modules split with a filler plate between the assemblies.

The **GMT 900 ('New')** has a one-piece headlamp assembly.

Product Design Differences

The **GMT 800 ('Classic')** has a passive ABS system and a thicker ABS cord (6 mm).
